

Fish Passage Center Weekly Report #07 - 31

October 19, 2007

1827 NE 44th Ave., Suite 240
Portland, OR 97213
phone: 503/230-4099
fax: 503/230-7559

Summary of Events:

Water Supply: Precipitation throughout the Columbia Basin varied between 57% and 193% of average at individual sub-basins over the first fifteen days of Water Year 2008 (began October 1, 2007). Over the beginning of the new water year, precipitation above The Dalles has been 130% of average. Over the entire 2007 Water Year, precipitation varied between 73% and 101% of average at individual sub-basins.

Table 1. Summary of early WY 2008 precipitation and total WY 2007 precipitation with respect to average (1971-2000), at select locations within the Columbia and Snake River Basins.

Location	Water Year 2008 October 1-15		Water Year 2007 October 1, 2006 to September, 2007	
	Observed (inches)	% Average	Observed (inches)	% Average
Columbia Above Coulee	1.35	151	25.13	98
Snake River Above Ice Harbor	0.71	122	14.13	79
Columbia Above The Dalles	1.05	130	22.06	94
Kootenai	1.61	180	26.09	99
Clark Fork	0.75	132	17.3	97
Flathead	1.06	131	21.3	90
Pend Oreille/Spokane	1.32	128	26.53	85
Central Washington	0.17	57	8.04	88
Snake River Plain	0.80	193	8.44	73
Salmon/Boise/Payette	0.49	81	15.93	79
Clearwater	1.06	101	27.35	88
SW Washington Cascades/Cowlitz	2.86	107	68.47	96
Willamette Valley	1.88	91	60.28	101

Grand Coulee drafted 0.9 feet last week, ending October 18th at 1286.4 feet. Outflows at Grand Coulee ranged between 51.6 and 71.7 Kcfs last week. It should be noted that inflows to Grand Coulee are less than usual due to a Non-power Uses Agreement between BPA and BC Hydro that has stored extra water in Canada over September and October for release during the Chum period between November and March.

Dworshak is currently at an elevation of 1517.5 feet (10-18-07) and drafted 0.6 feet last week. Outflows at Dworshak are currently 1.5 Kcfs.

The Libby Reservoir is currently at elevation 2434.9 feet (10-18-07) and held steady last week. Outflows at Libby have been 4.5 Kcfs.

Hungry Horse is currently at an elevation of 3533.9 feet (10-18-07) and drafted 0.8 feet last week. Outflows at Hungry Horse have been 1.9 Kcfs last week.

The Brownlee Reservoir was at an elevation of 2048.8 feet on October 18th, 2007, refilling 1.6 feet last week. Outflows at Brownlee Dam have been 7.0 to 12.0 Kcfs over the last week.

Smolt Monitoring: Monitoring continues at three SMP sites. Subyearling indices were up at Snake River sites, Little Goose and Lower Granite, while at Bonneville indices were down. Few spring migrants are being seen at SMP sites now.

At Lower Granite Dam, there was a increase in the average subyearling passage index, over the past two weeks with the average daily index at 115 per day compared to 15 per day the prior two weeks. Indices of subyearling Chinook at Bonneville Dam, averaged 40 per day over the past two weeks, compared to about 150 per day over the previous two weeks.

Hatchery Release:

Snake River Zone: The Snake River Zone encompasses the Snake River and its tributaries from its confluence with the Columbia River to Hells Canyon Dam. Releases totaling approximately 225,000 spring Chinook pre-smolts to tributaries of the Clearwater River were scheduled to end this week. Of these, approximately 67% were scheduled for release into Lolo Creek, with the remaining 33% scheduled for release into Newsome Creek. These spring Chinook pre-smolts are not expected to out-migrate until spring 2008.

There are no scheduled releases of juvenile salmonids into this zone over the next two weeks.

Mid-Columbia Zone: The Mid-Columbia Zone encompasses the area of the Columbia River and its tributaries from McNary Dam to Chief Joseph Dam. There were no scheduled releases of juvenile salmonids into this zone this week. Approximately 200,000 sockeye juveniles are scheduled for release into Lake Wenatchee in early November. These sockeye juveniles are not expected to out-migrate until spring 2008. There are no other scheduled releases in this zone over the next two weeks.

Lower Columbia Zone: The Lower Columbia Zone is defined as the Columbia River and its tributaries from Bonneville Dam to McNary Dam. There were no releases scheduled for the Lower Columbia River Zone this week nor are there any releases scheduled for this zone over the next two weeks.

Adult Fish Passage: As of October 18th, 154,663 fall Chinook adults and 51,261 jacks have passed Bonneville Dam. This season, the 2007 Bonneville adult fall Chinook count is about 53.1 percent of the 2006 count and is about 43.1 percent of the 10-year average. The 2007 Bonneville jack fall Chinook count is about 2 times greater than the 2006 count and about 1.38 times greater than the 10-year average. Daily counts for adult fall Chinook at The Dalles Dam ranged from 349 to 825 at The Dalles Dam as of October 18th, with a total count of 91,358. Daily fall Chinook counts at Rock Island Dam ranged between 16 and 53 with a

total of 3,428 for the season. In the upper Columbia, the 2007 Rock Island adult fall Chinook is about 65.7 percent of the 2006 count and about 37.9 percent of the 10-year average. In the Snake River at Ice Harbor Dam, the 2007 adult fall Chinook count of 13,120 is about 1.31 times greater than the 2006 count and 1.16 times greater than the 10-year average. In addition, the 2007 fall Chinook jack count at Ice Harbor Dam of 9,413 is about 1.41 times greater than the 2006 count and about 1.46 times greater than the 10-year average. At Lower Granite Dam, the 2007 adult fall Chinook count of 9,647 is about 1.24 times greater than the 2006 count and about 1.30 times greater than the 10-year average.

The 2007 steelhead count at Bonneville Dam was 316,933 as of October 18th. This season, the 2007 Bonneville steelhead count is about 97 percent of the 2006 count and is about 95.6 percent of the 10-year average. The daily steelhead counts at The Dalles Dam ranged between 476 and 866 for the week with the cumulative count of 236,748. About 74.7 percent of the steelhead counted at Bonneville has passed The Dalles Dam. The majority of the 195,121 steelhead counted at McNary Dam have moved up into the Snake River with the cumulative count at Ice Harbor now at 142,873 for the season. The 2007 Ice Harbor steelhead count is about 1.26 times greater than the 2006 count and 1.05 times greater than the 10-year average. The cumulative count at Priest Rapids Dam, in the upper Columbia, was 14,332 for the season as of October 13th. The 2007 steelhead count at Priest Rapids is about 1.41 times greater than the 2006 count and 1.07 times greater than the 10-year average. At Rock Island Dam, the 2007 adult steelhead count of 12,726 is about 1.39 times greater than the 2006 count and about 99.5 percent of the 10-year average.

The coho salmon run at Bonneville has been increasing over the last week with 75,148 adults and 3,464 jacks to date. To date, the 2007 Bonneville coho count is about 82.3 percent of the 2006 count and 83.6 percent of the 10-year average. At McNary Dam, the 2007 coho count of 17,994 is about 1.81 times greater than the 2006

count and 1.84 times greater than the 10-year average. The 2007 coho jack count at McNary Dam of 2,136 is about 2.07 times greater than the 2006 count and about 2.51 times greater than the 10-year average. At Priest Rapids Dam the 2007 coho count of 6,497 is about 3.06 times greater than the 2006 count and 4.1 times greater than the 10-year average. In the Snake River at Ice Harbor Dam, the 2007 coho count of 1,693 is about 2.51 times greater than the 2006 count and about 2.30 times greater than the 10-year average.

Hatchery Release Last Two Weeks

* See sampling comments <http://www.fpc.org/currentDaily/smpcomments.htm>

Smolt indices, clipped & unclipped or combined, are presented in the following order: yearling chinook (chinook 1's), subyearling chinook (chinook 0's), steelhead, coho, and sockeye. Two classes of fish counts are shown in these tables: collection counts, which account for sample rates but are not adjusted for flow; and passage indices, which are collection counts divided by the proportion of water passing through the sampled powerhouse. Passage indices are not population estimates, but are used to adjust collection counts for daily fluctuations in the site's or project's operations. The classes of counts presented in the report are defined below for each site. Most samples occur over a 24-hr period that spans two calendar days. In this report, the date shown corresponds with the sample end date.

Definitions for Smolt Index Counts

- WTB (Collection) = Salmon River Trap at Whitebird : Collection Counts
- IMN (Collection) = Imnaha River Trap : Collection Counts
- GRN (Collection) = Grande Ronde River Trap : Collection Counts
- LEW (Collection) = Snake River Trap at Lewiston : Collection Counts
- LGR (Index) = Lower Granite Dam Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- LGS (Index) = Little Goose Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- LMN (Index) = Lower Monumental Dam Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- RIS (Index) = Rock Island Dam Second Powerhouse Bypass Trap : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse 2 Flow / (Powerhouse 1 & 2 Flow + Spill)}
- MCN (Index) = McNary Dam Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- JDA (Index) = John Day Dam Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse Flow / (Powerhouse Flow + Spill)}
- BO2 (Index) = Bonneville Dam Second Powerhouse Bypass Collection System : Passage Index Counts
Passage Index = Collection Counts / {Powerhouse 2 Flow / (Powerhouse 1 & 2 Flow + Spill)}

JDA and BO2 data collected for the FPC by Pacific States Marine Fisheries Commission.
 RIS data collected for the FPC by Chelan Co. PUD/Washington Dept. of Fish and Wildlife.
 LGR, LMN, and MCN data collected for the FPC by Washington Dept. of Fish and Wildlife.
 LGS and GRN data collected for the FPC by Oregon Dept. of Fish and Wildlife.
 IMN data collected for the FPC by the Nez Perce Tribe.
